

Multimedia Banana Peel® Cable

Cable solutions from Belden for home automation, networking, security and entertainment systems.

The overall jacket has been eliminated to make Banana Peel® cables easy to identify, easy to pull and easy to terminate.

Benefits

- Patent-pending design affixes the individual cables to a center spline, eliminating the need for an overall jacket
- Cables have a smaller O.D. than traditional composite cables, improving the cable's overall bend radius for faster, easier installation
- Individual data, coax and fiber cable components are all instantly identifiable and ready for termination - just peel the individual cables off the center spline
- Verified Category 5E Performance

Available in two configurations:

- 2x2 (two data cables, two coaxes)
- 2x2x2 (two data cables, two coaxes and two fibers)

All are rated CMR/C (UL) CMG FT4, and all come standard on 500' and 1,000' reels.

Banana Peel® cables include:

- Belden 7876S — Two Cat 5E 4-pair bonded UTP data cables, plus two Series 6 Duobond Plus® coaxial cables
- Belden 7878S — Two Cat 5E 4-pair bonded UTP data cables, plus two Series 6 Duobond Plus® coaxes and one 2-fiber LANLite® distribution cable
- Belden 7913S — Two Cat 5E 4-pair UTP data cables, plus two Series 6 Duobond IV Quad Shield® coaxes
- Belden 7914S — Two Cat 5E 4-pair UTP cables, plus two Series 6 Duobond IV Quad Shield® coaxes and one 2-fiber LANLite® distribution cable.
