

## Power & Tel Environmental Policy

We are committed to maintaining our reputation as an environmentally responsible corporate citizen of the Piperton community. Our organization will accomplish this by...

- Complying with applicable environmental regulations and other requirements;
- Continual improvement of our environmental processes and prevention of pollution.

Please be aware that employee support of our environmental program, including recycling, benefits our company, and ensures that we stay compliant with regulations.

The measurement of our success is through progress towards the achievement of environmental objectives/targets, also known as **Key Performance Indicators**, that are periodically reviewed for effectiveness.

*This policy is authorized by Dennis Dominiononi and Anita Reid.*
